

Nerva OS

Your operating system for running a business with AI.

What it is

Nerva OS turns Claude Code into a fully-trained business assistant that lives on your computer. It knows your business, remembers what you tell it, and runs 37 specialist skills covering sales, marketing, operations, finance, and admin. One install. No subscriptions to wire up. No technical setup.

What's inside

- **37 specialist skills** — sales, marketing, finance, ops, admin, research, and more
- **Safety layer** — a constitution-style guardrail system that keeps the assistant inside the boundaries you set
- **Workspace template** — a pre-built `my-assistant/` folder with memory, inbox, and the brain file already wired up
- **Tutorials & install prompts** — paste one prompt into Claude Code and your assistant builds itself
- **Engineering Pack (paid upsell)** — 56 additional skills for technical work, deployment, and code review

Who it's for

Non-technical small business owners who want an AI assistant that actually understands their business — not a generic chatbot. If you can paste a prompt into a window, you can install this.

How to install

1. Buy the kit, clone the repo, and open Claude Code.
2. Open `SETUP-PROMPT.md` and paste the prompt inside into Claude Code.
3. Claude does the rest.

Prefer to install manually? See `INSTALL.md` for a step-by-step plain-English guide.

For a tour of what's actually in the kit before you start, see `WELCOME.md`.

Pricing

Tier	Price (placeholder)	What you get
Nerva OS (one-time license)	\$XXX	The 37-skill kit, safety layer, workspace template, and install prompts. Yours forever.
Engineering Pack add-on	\$XXX	56 additional skills for technical work, deployment, code review, and developer workflows.
Zoom support	\$XXX/hour or \$XXX/month	One-on-one help getting set up, customising your assistant, or troubleshooting.

Prices in USD. See [LICENSE](#) for full terms.

License

Nerva OS is distributed under a proprietary single-business-use license. Individual skills that originate upstream under Apache 2.0 retain their original license and attribution. Full terms in [LICENSE](#) .

Support

Email support@nerva-os.com if anything doesn't install or doesn't work the way the docs describe. We aim to reply within one business day.
